

## The Early Childhood Innovation Network will:

Build parent and provider relational capacity--Increase child social-emotional self-efficacy--Integrate principles of neuroscience into practice--Leverage collective strengths to increase quality and capacity

### ***Innovation and Implementation***

- Adapt and deploy promising interventions
- Rapid-cycle quality improvement evaluation
- Place-based in targeted neighborhoods
  - Platform to test innovative ideas
- “Tertiary Prevention”-Based in Social-Cognitive Theory

### ***Education and Technical Assistance***

- Integration of science into practice
  - Discrete, time-limited projects
- Opportunities identified through structured assessment of need and available resources
- “Secondary Prevention”-Based in Organizational Change Theory

### ***Policy and Community Advocacy***

- Geographic city-wide focus
- Policy platform built on evidence, data, and provider experiences
- Leverages and aligns with specific expertise of team members and institutional partners
- “Primary Prevention”-Based in Social-Ecological Theory
