

Vision

To empower families to raise children who are healthy in mind, body and spirit.

Mission

To build a culture of health by providing clinical care to children in a community-based environment with a focus on healthy lifestyle behaviors for the entire family.

Objectives

- Build community partnerships for effective collaboration
- Improve health outcomes by addressing the needs of the community
- Provide family centered pediatric medical care: preventive, well and sick care
- Provide healthy lifestyle education for the entire family
- Partner with caregivers and educators to improve school readiness and success
- Improve health by addressing adverse childhood experiences (ACEs)
- Support healthy lifestyles to prevent obesity through promotion of healthy eating and physical activity
- Provide positive parenting and life skills classes
- Create a parent advisory board of community members to carry out the mission
- Empower parents to be health advocates in their community
- Create job opportunities within the neighborhood
- Track health outcomes reflecting the Center's efforts in order to evolve health care delivery
- Replicate the Center's model in communities with similar needs

Opening

Fall 2016
